How to Clean the Inside of a Laser Printer - How to Clean the Inside of a Laser Printer by viandant5 240,618 views 3 years ago 4 minutes, 18 seconds - Over time, **laser printers**, can become dirty due to excess toner leaking out of the cartridges. This video explains how to clean the ...

First of all turn off the printer
Remove the toner cartridge and the drum unit
The drum is often built into the toner cartridge
Keep the drum in a dark place the light may damage it
Here's what the drum looks like
A laser printer uses powdered toner in the print process
you need alcohol and a clean cloth
The average vacuum cannot filter toner dust effectively
Do not use compressed air or canned air
and the dust could fly all over the printer
and inside the scanner unit causing more problems
Don't use flammable substances or any type of spray
Remove the spilled toner and the dust
Toner is likely to build up under the cartridge housing
To clean parts that are difficult to reach use a paintbrush
To clean the electronic contacts isopropyl alcohol is ideal
Alcohol is great for dissolving grease, and oil
to remove built-up toner and the dust
Clean the paper pick-up roller with a soft dry cloth and alcohol
The rollers might be near the paper tray
Clean the transfer roller (the foam roller near the drum)
Clean the glass of the scanner unit with a cotton cloth
You can use normal glass cleaner or alcohol
Remove the paper tray

in this case you can use a normal vacuum
